

ATLANTIS OUTDOOR CABINETRY

PRODUCT SPECIFICATIONS

Perma-Panel

Perma-Panel™ is a solid polymer material with UV inhibitors, ideally suited for outdoor applications. Since it's a solid polymer, it won't absorb moisture, split, crack, rot, or swell. "Perma-Panel" is designed to withstand sun, rain, snow, and saltwater. It's available in a variety of colors to meet any of your design needs.

Wood

Wood doors and drawer heads are available in Teak or Cypress. Doors, drawer heads, and applied doors do require initial as well as periodic applications of "Teak Oil." Doors and drawer heads are not oiled. Cabinets are constructed of Perma-Panel material.

Atlantis Cabinet Construction

Atlantis cabinets are constructed using the European styled full access method. Tops, bottoms and sides, made of 3/4" "Perma-Panel" are joined together using friction fit plastic dowels and concealed, rust proof locking cams, providing maximum construction strength. Backs are 1/4" thick and dadoed into sides, top and bottom.

Drawer Box

The drawer box in Atlantis cabinets feature 3/4" sides and a 1/4" bottom – all constructed of easy to clean "Perma-Panel" material. The drawer glide is a resistant steel/stainless steel construction with a special clear coating, specifically developed to be exceptionally weather-resistant. It features full extension action, a 100 pound load rating, a positive stop to keep the drawer from being accidentally pulled out of the cabinet, and a lever release for easy drawer removal.

Hinges

Hinges are of rust proof stainless steel construction, fully concealed, spring loaded and self closing with a maximum opening of 100 degrees, and are mounted on a base plate attached to the cabinet side. All standard height cabinets feature three hinges for maximum strength.

Shelves

Atlantis shelves are 3/4" thick, adjustable on 1 1/4" increments and are supported by nylon coated steel pin shelf supports that are recessed into the underside of the shelf to prevent forward or backward movement. Wall shelves are full depth and base shelves are 16 1/4 inches deep.
